## RICE HUSK GAS STOVE Batch-Type

Designed and developed to provide low income households an affordable, efficient, and convenient cooking device that produced gaseous flame using rice husk as fuel. Through gasification, a luminous blue to pink color flame can be derived during cooking. For each household, about 1 to 2 tons of rice husk per year is needed.

- Features:**
- Uses agri-waste rice husk as fuel
  - Affordable
  - Convenient to use
  - Easy to ignite fuel
  - No smoke during operation
  - Flame intensity can be controlled
  - Uses very small amount of DC current to energize the fan
  - Easy to load fuel and to discharge char
  - Adoptable for AC outlet, battery, or solar panel
  - Highly efficient
  - Handy
  - Safe to operate

Model	RHGS-12D
Fuel	Rice Husk
Fuel Consumption Rate	400 grams per load
Flame Color	Blue to pink
Power Output	0.96 kW
Fan	3 watt, 12 volt DC
Start-Up Time	1 min
Time to Boil Water	12 min for 2 liters of water
Operating Time	18-20 min cooking
Overall Dimension	20 cm W x 20 cm L x 50 cm H
